

# Additional Services - Transfers Out of the Area

We have assisted many families with deaths that occur away from home. For those choosing burial out of the area, we have the staff, facilities and relationships with other funeral homes to assist you in this time of need. Regardless of the situation, you may rely on us to handle all of the details.

It is important that you know...

- Regardless of the place of death, you may have a viewing, visitation or service both locally and/or afar.
- Many families appreciate being able to view their loved one prior to the transfer out of the area. Viewing a loved one prior to the transfer may give peace of mind in knowing that all services were conducted as instructed by you and your family.
- The transfer of your loved one can be conducted in one of our vehicles or by an airline.
- You may accompany the casketed remains of your loved one (*either by vehicle or by airline*).
- We can handle all of the arrangements with another funeral home. Many families appreciate handling the details with one funeral home instead of two.
- There are two types of containers commonly used for the transfer to a location out of the area; a casket (*with protective air tray*) or a combination unit (*as shown on this page*).

*Combination Unit*

*Casket*

*Golden Sand Flex®*

*(see pages 16-25 for additional options)*

Note: Each casket is placed inside of a protective air tray for transportation.

## *Memory Benches*

Many families select a memory bench for placement on or near the resting place of their loved ones. In addition to serving as a fitting memorial, memory benches offer families a comfortable place to sit and reflect. Others choose to place a memory bench at their home in memory of someone special.

Memory benches are available in a wide variety of styles and granite colors. All benches may be engraved with personal text or emblems.

*Cohen*

Available with or without a vase.

*Young*

Available with or without a vase.

## *Additional Services*

Some additional services we provide include:

### *Dove Releases*

The release may occur at the funeral home, cemetery or other meaningful place.

### *Butterfly Releases*

The release may occur at the funeral home, cemetery or other meaningful place.

### *Bagpipes*

Bagpipes are most frequently used for military, law enforcement and fire department veterans but are acceptable under any circumstances. This tribute may occur at the funeral home, cemetery or other meaningful place.

### *Scattering by Boat*

Many families appreciate being present and taking part in the scattering tribute. There are a variety of boat options that can accommodate you and your family. Additionally, many people appreciate the dignity of using a scattering urn for the scattering process (see pages 81-82).

### *Scattering by Airplane*

This is frequently selected by those families who do not wish to be present for the scattering process.

Venice Memorial Gardens now offers families a year round flower program for their convenience. The final resting place of your loved one will be adorned with florist quality artificial flowers appropriate for every season. A special holiday arrangement is also available. Please consult us for details.
