

Outer Burial Containers

Are outer burial containers required?

In most areas of the country, laws do not require the use of an outer burial container (a.k.a. "burial vault") to surround the casket in the grave. Many cemetery by-laws do however, require that such a container be used. The use of an outer burial container may protect the casket and prevent the grave from sinking.

Bronze Triume®

- Double-lined bronze and seamless plastic
- Bronze carapace ■ 2 Bronze accent bars
- High-strength concrete construction

Copper Triume®

- Double-lined copper and seamless plastic
- Copper carapace
- Six die-cast electroplated handles
